

The International Max Planck Research School for Molecular and Cellular Life Sciences

The International Max Planck Research School for Molecular and Cellular Life Sciences, jointly conducted by Munich based Max Planck Institutes and Universities, is an internationally recognized center of scientific and educational excellence. More than 50 distinguished group leaders actively participate in its PhD program and offer challenging and cutting-edge PhD projects in the following areas:

Biochemistry
Neurobiology
Cell Biology
Molecular Medicine
Structural Biology

The PhD program provides comprehensive scientific training in a superb and vibrant research environment with state-of-the-art facilities. While students specialize in a particular research topic, the interdisciplinary context of the program facilitates interactions with researchers from other disciplines and fosters cross-frontier thinking.

Laboratory work is supplemented by seminars, summer schools, elective courses, career development training and participation in national or international conferences.

Munich, as one of the leading German research areas in life sciences, offers a unique mixture of academic and urban lifestyle spiced with Bavarian tradition.

Highly qualified candidates with a deep commitment to basic and/or clinical research are invited to apply. Applicants should hold a MSc (or an equivalent degree) with a strong background in biological sciences, biochemistry, biophysics, biotechnology or a related discipline. Candidates with a Bachelor's degree are invited to apply for the integrated fast track program (1+3 years).

All students accepted into the program will be fully supported with a PhD fellowship covering living expenses and tuition.

Closing date for application is January 15, 2011; selection will be completed by March 15. Accepted candidates may start research projects as early as April 2011.

We offer you:

- ✓ Structured PhD program organized by Munich-based Max Planck Institutes and Universities
- ✓ State-of-the-art facilities and cutting edge research projects
- ✓ Individualized supervision and mentoring
- ✓ International setting – PhD program taught in English
- ✓ Full funding provided for international and German students

We are looking for:

- ✓ Highly talented and motivated doctoral students from all over the world with a strong passion for science
