

Research Associate in Antibody Engineering (temporary)

Who we are

At Roche, 80'000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. Our success is built on innovation, curiosity and diversity, and on seeing each other's differences as an advantage. To innovate healthcare, Roche has ambitious plans to keep learning and growing – and is seeking people who have the same goals for themselves.

The Position

GLYCART biotechnology AG, a 100% affiliate of Roche Pharmaceuticals, is active in the research, development and commercialization of new potent antibody-based products for the treatment of cancer and autoimmune disease. We offer a stimulating and truly international environment. Glycart is located in Schlieren/Zurich.

To further strengthen our organization we are looking for a
Research Associate in Antibody Engineering

Who you are

You're someone who wants to influence your own development. You're looking for a company where you have the opportunity to pursue your interests across functions and geographies, and where a job title is not considered the final definition of who you are, but the starting point.

In this position (limited for three years, but renewable) you will join a team devoted to the production and purification of antibodies and other recombinant proteins. You will be responsible for expressing and purifying antibodies and proteins for internal research projects, as well as for external research collaborations. For this demanding position in a dynamic environment, we are looking for a Research Associate who holds a Bachelor or equivalent degree or a Lab technician in Biochemistry/Biotechnology. Hands-on experience with mammalian cell culture and purification techniques is required. Familiarity with Protein analysis (SDS-PAGE, Western Blot and ELISA) is advantageous. Fluency in English is a must, German would be an asset. You have a high degree of self-motivation, flexibility and are able to independently conduct experiments. You are also inquisitive and strive for continuous process improvement. In addition you interact effectively with a truly multinational team of scientists.

If you are interested in working in an environment that is challenging and rewarding, we're interested in hearing from you!
