

## *Formulation Scientist & Lab Leader in Formulation Research Biologics and Parenterals*

### **Who we are**

At Roche, 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. Our success is built on innovation, curiosity and diversity, and on seeing each other's differences as an advantage. To innovate healthcare, Roche has ambitious plans to keep learning and growing – and is seeking people who have the same goals for themselves.

The headquarters in Basel is one of Roche's largest sites, over 8,000 people from approximately 80 countries work at Roche Basel. Favored by its geographic location in the heart of Europe, the Basel area is one of the most dynamic economic regions in Switzerland – a great place to live and work.

### **The Position**

You are leading a formulation research lab within the group «Formulation Development Biologics & NCE Parenterals». Your main responsibilities are:

- The pharmaceutical and analytical characterization of parenteral dosage forms (proteins, peptides, NCEs)
- Definition and implementation the development strategy for drug product and align with your partners in Drug Substance & Bioprocess Research and Development as well as in Protein Analytics
- Development of the manufacturing process for aseptic production of GLP-Tox supplies, stability studies for regulatory filings and clinical supplies (phase 1 and 2)
- Representation of drug product formulation development in international project teams. As a departmental project leader you drive and coordinate all activities around drug product
- Staying current in formulation science in theory and practice

### **Who you are**

You're someone who wants to influence your own development. You're looking for a company where you have the opportunity to pursue your interests across functions and geographies, and where a job title is not considered the final definition of who you are, but the starting point.

For this position you bring the following qualifications:

- You hold a Ph.D. degree in Life Sciences, ideally with some experience in protein formulation development and/or aseptic manufacturing and analytics of sterile drug product (liquids & lyophilisates)
- You have a strong interest in (bio)technology and physico-chemical aspects of new therapeutic compounds
- You are thrilled by innovation and out of the box thinking
- This position requires a good team player and networking skills
- You are a self starter with a high degree on flexibility, reliability and pro-active hands-on attitude
