

European Molecular Biology Laboratory

## PhD STUDENT POSITION (E13/2)

A PhD student position is available at the University Cancer Center Hamburg (UCCH), Department Pathology, to investigate the structural biology of proteins expressed in prostate cancer, their structural-functional relationship as well as clinical consequences and therapeutic perspectives.

Diverse methods and technologies to be applied in this project include: molecular cloning of cDNA from prostate cancer tissue, ultrapure preparation of recombinant proteins and their structural analysis in close collaboration with the group of Dr. Wilmanns at the *European Molecular Biology Laboratory (EMBL)*, on DESY campus in Hamburg-Bahrenfeld.

■ You are: A scientist with graduation in biology, biochemistry, chemistry, or pharmaceutical sciences with genuine interest in the research topic outlined above. Prior knowledge in molecular biology and protein chemistry will be advantageous.

■ For further information please contact Prof. Dr. Matthias Wilmanns, phone +49 (0)40 89902 – 110.

■ Please direct your application until 10th September, 2010, to: **EMBL Hamburg** c/o DESY, Prof. Dr. Wilmanns, Building 25A, Notkestraße 85, 22603 Hamburg, Germany or by email to: [matthias.wilmanns@embl-hamburg.de](mailto:matthias.wilmanns@embl-hamburg.de)
