

Memo Therapeutics, an ETH spin-off company active in the development of novel antibody technologies and therapeutic antibodies is seeking a

**Biologie Laborant(in), TA, MSc
Research Associate 60-100%
(Cell Culture – Cytometry)**

You will work in an interdisciplinary team at the interface of our microfluidic antibody discovery platform and our development programs.

Required profile:

- Research technician or MSc with at least 3 years of experience in an academic or company environment
- Extensive experience with cell culture (propagation, transfection)
- Hands on experience with cytometry and other cell sorting platforms
- Immunology/Antibody background would be a plus
- Strong organisational and planning skills
- Start-up-compatible mind set

Memo Therapeutics AG offers an excellent team environment and career opportunities in a dynamic start-up in state of the art facilities at the Biotechnopark Schlieren, Zurich.

Interested? Send your **short** cover letter and CV **combined in a single PDF document** until February 28 to: [jobs\(at\)memo-therapeutics.com](mailto:jobs(at)memo-therapeutics.com).
